To the Class of 1966

Undoubtedly you have heard someone say, usually with a sigh, "my college years were the happiest of my life." Feel sorry for the guy if you like, but don't believe it!
Certainly I hope they were pleasant years for you, but they should be and will be only a small taste of the life that lies ahead of you. To establish and then pursue successfully a useful career carries rewards far greater than any you have won so far. You can testify that success in college is a mixture of excitement and satisfaction, hard work and concentration, some pain and disappointment. Without the comforting shelter of alma mater you will find these ingredients come in larger doses and probably reversed in sequence, but the excitement and satisfaction are there to be had if you are ready to grit your dentures and fight for it.
Cooper Union has helped you form a sound and solid base to start from. Now we heartily and sincerely wish for you those happy years that lie ahead.
